EDUCATION

B.S. Computer Science

Arizona State University, Tempe, AZ
Barrett, the Honors College

Dec 2024

GPA: 4.00

M.S. Computer Science

Arizona State University, Tempe, AZ

Expected Dec 2025

Current GPA: 3.78

TECHNICAL SKILLS

Programming Languages: C#, Java, C++, HTML/CSS, SQL, Python, Javascript/Typescript, Swift

Tools & Software: API Integration, Amazon Web Services (AWS), Google Cloud Run, Terraform, Azure DevOps, .NET Framework, Angular, React Native, Firebase, Git, Unity, Unit Testing

PROFESSIONAL EXPERIENCE

Charles Schwab - Software Development Intern (*Cloud Support and Operations Team*)

Jun - Aug 2025

- Designed and developed a **full-stack** internal web application to streamline the cloud go-live approval process, reducing manual overhead and improving visibility across teams.
- Built the backend/APIs with **Java Spring Boot** and **JPA**, modeling relational data and enabling scalable service integration.
- Enabled dynamic configuration using **YAML** templates, allowing frequent updates to workflow without code changes.
- Developed frontend with **Angular** and deployed services to **Google Cloud Run** using **Terraform** for infrastructure automation.
- Collaborated across cloud teams, gathering requirements and presenting final deliverables to ~50 stakeholders and engineers.

AVEVA - R&D Software Development Intern

May - Aug 2024

- Designed and implemented a system health check and telemetry service for critical background services, improving reliability and reducing downtime risk. Employed **C#**, **API integration**, and **JSON** formatting, achieving 88% test coverage.
- Added authorization to an API endpoint while optimizing task execution using asynchronous tasks, and implemented error logging while resolving race conditions and handling aggregate exceptions.
- Gained hands-on experience with **Kubernetes** and related tools including **Minikube** and **OpenLens**.

AVEVA - R&D Software Development Intern

May - Aug 2023

- Improved application performance by migrating critical methods from **Entity Framework Core** to **SQL stored procedures**, achieving an estimated 30% reduction in query execution time, and implemented comprehensive **unit tests** using tSQLt.

TECHNICAL PROJECTS

DocYou LLC Mobile Application: Cofounder, Backend Developer

Aug 2021 - May 2025

- Developed a **React Native** mobile app that improves procedure documentation efficiency for 50+ medical residents, in partnership with Phoenix Children's Hospital.
- Leveraged **Firebase** for real-time data management and secure user authentication.
- Designed initial **Figma** prototypes and secured \$16,000 in funding from participation in various competitive pitch competitions.

3D Analytics Machine Learning Environment

Jan - Dec 2024

- Utilized **Unity** and **C#** scripts to develop an interactive 3D learning environment to explore supervised and unsupervised machine learning algorithms (binary classification, k-nearest neighbors, k-means), used by over 300 machine learning students.
- Implemented visualizations to help students understand algorithmic outcomes in a user-friendly 3D space.

AWS Cloud Face Recognition Pipeline

Mar - May 2025

- Designed a serverless face recognition pipeline using **AWS Lambda** and **containerized** functions in **AWS ECR**, with asynchronous messaging via **SQS queues** processing 100 video frames with <3s latency with 100% accuracy.
- Developed Lambda functions for face detection, optimizing container images to minimize ECR storage and cost.
- Extended the solution to use **edge computing** by deploying **AWS IoT Greengrass** components on EC2 devices, configuring IoT Core policies, certificates, and recipes to enable secure local MTCNN face detection and MQTT-triggered cloud recognition.

LEADERSHIP EXPERIENCE

Vice President of Internal Affairs: Women in Computer Science

Aug 2023 - May 2025

- Organized twice-weekly meetings involving technical workshops, guest speakers, socials, and mentorship programs, with over 12 industry sponsors and a budget of over \$20,000.
- Hosted an annual programming competition/hackathon with over 120 attendees, judges, and volunteers.
- Led recruitment efforts during ASU's welcome week, resulting in a record turnout of 110 people at the first meeting.

AWARDS

Outstanding Graduate: Impact Award

Dec 2024

Awarded to 10 Fulton Schools graduates per semester for leadership and contribution beyond the classroom

ASU Grace Hopper Celebration Scholar

Oct 2023
